

Screen Processing Equipment

SCREEN EXPOSURE SYSTEMS

A large variety of systems are available to match your frames sizes, volume of screens per day, type of emulsion sensitivity, and floor space limitations.

Shown is a 1500W Console unit and 5KW Stand unit.

A wider range of systems types are available. Please contact us for complete info on those as well as the full range of vacuum frames.

WASHOUT / CLEANING SYSTEMS

For developing images and water process recycling, chemical rinsing and pressure spraying, we have options tailored to fit the needs of your production.

Shown is a wash-booth and an automated recycler.

A wider range of systems types are available. Please contact us for complete info on screen processors and chemical dispensers.

SCREEN DRYING CABINETS/RACKS

Reduce stencil flaws and speed up your screen making process with an often overlooked piece of equipment. Drying can be the slowest and most frequent step in processing screens and stencils.

A wider range of systems types are available. Please contact us for complete info on sizes for standard frame O.D. formats.

Tech Tip:

Because screen printing grew out of a rudimentary craft, "equipment" for screen-making can be the sun & a piece of glass, a large sink & hose, and a window fan & closet. Refinement of print applications has afforded many better engineered designs, tailored to well fit commercial needs.

To speed up lengthy screen drying steps, use an air-hose or vacuum attachment to remove bulk moisture after image development.

Pressure sprayers are one of the overlooked "basics". It often wins the "one of the best investments our shop ever made" award.
