- Extra Large Screen Capacity
- Easy Cleaning / Maintenance
- Durable Hold-Down Blanket
- Powerful Vacuum Hold-Down
- Two-Part Cabinet, Easy Installation

PhotoSharp's performance is simply unmatched. PhotoSharp offers the Highest Resolution, Fastest Exposure Times and Longest Lamp Life. The small focused lamp reflector maximizes image resolution. The shuttered lamp system provides faster exposure times by eliminating the warm up time associated with instant start systems and extends the lamps life by reducing the number of lamp strikes. The dual-spectrum lamp is spectrally matched with both diazo and photopolymer sensitized emulsions for maximum speed and flexibility. The Two-Part Cabinet design enables this unit to fit through a standard doorway.

PART	DESCRIPTION
